

Bethany Kwan: [https://coprhcon.learningtimesevents.org/wp-content/uploads/2021/05/Kahn\\_DataQualityAssessments.pdf](https://coprhcon.learningtimesevents.org/wp-content/uploads/2021/05/Kahn_DataQualityAssessments.pdf)

Katy Trinkley: We have the same problem with terminology in implementation science!

Bethany Kwan: Who knew data quality was so full of drama! Do we call this group the United Nations of clinical data informatics?

Katy Trinkley: Mapping meds is SO challenging!

Katy Trinkley: That was a great introduction to the website! Looks like a great tool

Denise Smith: I wonder how many published studies using secondary data did not complete a data quality process.

Wendy: Are there any example data quality protocols that could be shared to manage workflow with regard to all of these steps and procedures?

Katy Trinkley: I like the idea of a common data model and a framework or process model for doing quality checks

Denise Smith: Compass data - which model is it most compatible with?

Bethany Kwan: Compass follows OMOP

Denise Smith: thx

Wendy: Really helpful - thank you!
