Bethany Kwan: Find Dr. Garner's poster here: <https://cophcon.learningtimesevents.org/202182/>

Amy Huebschmann: We welcome all attendees to put questions in the chat for Dr. Garner -- and to do the same for our other presenters. We will do a brief question between presentations and have some panel discussion at the end.

Cole Hooley: Nice work Bryan!! How did you measure sustainment?

Bethany Kwan: Dr. Kenzie's abstract and poster: <https://cophcon.learningtimesevents.org/202136/>

Borsika Rabin (she/her): Really interesting approach to visualize qualitative data, Dr. Kenzie!! Has this been used in other fields? How did you first learn about this approach?

Bryan Garner (RTI International): Thanks, Cole! Sustainment was measured 6-months after the ATTC Strategy support for all organizations ended and was measured via staff survey. About 1/3 of orgs in both conditions had at least some level of sustainment, but it didn't differ by condition. However, at least we had about 1/3 having some level of sustainment, which is better than zero. :-)

Borsika Rabin (she/her): @Dr.Kenzie - thank you!! Look forward to seeing how it evolves! I am also thinking of understanding adaptations.

Bethany Kwan: Dr. Pittman's abstract and poster: <https://cophcon.learningtimesevents.org/202194/>

Katy Trinkley: I love the emphasis on rapid methods! Something that often seems like a hurdle for so much of our stakeholder work.

Bethany Kwan: Dr. Stadnick's abstract and poster: <https://cophcon.learningtimesevents.org/202119/>

Russell Glasgow: Love the Micro board example... anyone have a reference for this?

Margaret Crane: <https://jamboard.google.com> is a simple version of this too!

Russell Glasgow: Use of theory of change (love 'logic model on steroids comment) might be interesting cross-group discussion...way to incorporate several of the recommendations Dr. Mittman made..... how did it work for community stakeholders?

Bethany Kwan: Dr. Vanderhout's abstract and poster: <https://coprhcon.learningtimesevents.org/202116/>

Borsika Rabin (she/her): Thank you @Dr. Stadnick for sharing our work!

Borsika Rabin (she/her): @Dr. Glasgow - community members engaged really well in this process. Hardest task was think about measures but once examples were provided, they were very productive!

Nicole Stadnick (she/her): @Dr. Glasgow and @Margaret Crane, the Theory of Change process was well-received by our community stakeholders. It was a structured process that offered ample time for discussion. A critical part was that each meeting was led by our community partners at the Global Action Research Center. They are well-respected and influential community leaders so trust was already established with many of the CAB members. Miro was also very easy-to-use and helped with interaction!

Russell Glasgow: What do people think about issues of collecting PROs around social needs- pros and cons and their use going forward to address health equity issues...

James Pittman: @Dr. Glasgow, there is a growing interest and effort to collect social determinants of health information in the VA.

Demetria McNeal: @Dr. Glasgow - collecting PROs are indeed needed however I submit that while collecting that information around social needs, we also collect the data around the availability of resources or lack thereof to support the social needs.

Amy Huebschmann: Placing this in chat for now -- will verbally call this out in a moment, as well. What's coming up next:

Bethany Kwan: the dicemethods.org tool lets users choose which stage of research stakeholders will be engaged in

Amy Huebschmann: what's next? - break with 'hallway conversation' if you have questions or want to chat with Dr. Kwan -- if want a primer on pragmatic trials, then join Megan's introductory talk at 12:30 - otherwise reconvene at 1pm for the concurrent sessions - either the D&I or the data science track.

Russell Glasgow: @Dr McNeal and others- thx for great comments and insight on SDOH PROs

Bethany Kwan: Dr. Rodger Kessler's talk on PRO measures tomorrow morning may be of interest!

Erin Kenzie: Thank you so much everyone -- this was a lot of fun

Bethany Kwan: Thank you, panelists! That was fantastic - lightning fast and informative!
